Facade System

Why Custom Metal™?

Custom Metal Windows & Doors offers bespoke craftsmanship that blends timeless elegance with modern design. Fully customizable materials, profiles, finishes, and glazing ensure seamless integration across luxury homes, high-quality commercial spaces, and classic or contemporary architecture.

Materials

STEEL is a high-strength framing material that supports extremely slender sightlines, oversized glass, and precise, architecturally crisp details.

STAINLESS STEEL offers the strength of steel with elevated corrosion resistance, making it an excellent choice for coastal, pool, and harsh-climate applications.

CORTEN or weathering steel, develops a protective oxide patina that deepens in color over time, creating a warm, sculptural façade material.

BRONZE provides a classic, time-honored look with exceptional resistance to corrosion; it does not rust and becomes richer in tone as it ages.

Functions

WINDOWS

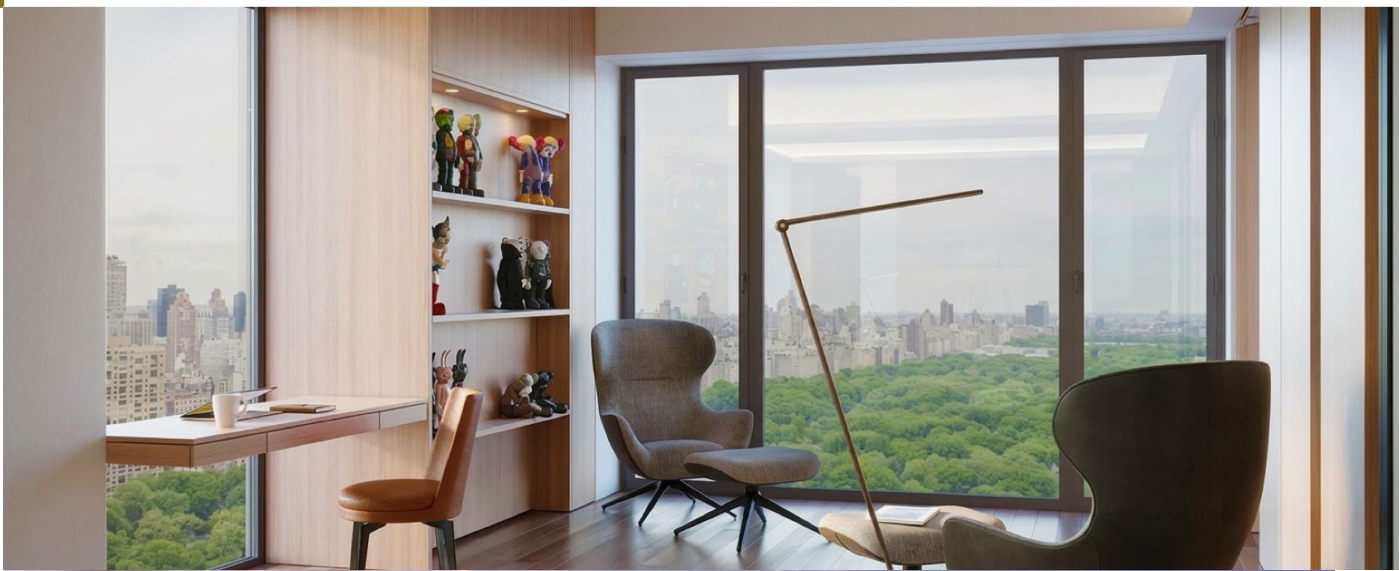

- Fixed
- Casement
- Awning
- Hopper
- Tilt-Turn
- Horizontal/Vertical Pivot
- Pass Through

DOORS

- Swinging
- Pivoting
- Folding
- Lift & Slide

About Custom Metal™

Custom Metal is a leading manufacturer of custom metal windows and doors engineered for precision, performance, and design flexibility. With nearly four decades of expertise, we specialize in steel, aluminum, bronze, and stainless steel window and door systems crafted to meet the highest architectural standards.

Each product is designed for energy efficiency, durability, and aesthetic excellence, and incorporates thermally broken technology for superior performance in any climate. Whether modern, traditional, or historic architecture, our fenestration systems blend craftsmanship with innovation to elevate every project.

Our nationwide network of certified installers across the United States and Canada ensures seamless service, professional installation, and support from concept to completion

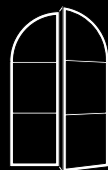

Trusted by architects, builders, and homeowners, Custom Metal delivers sustainable, made-to-order solutions that enhance building design, increase property value, and endure for generations.

Cutting-edge design
Exceptional performance
Engineered for comfort & security
